

IM-VDA-01/04

12vDC 100mA Power Input

4 x Composite Video Outputs

1 INPUT TO 4 OUTPUT VIDEO DISTRIBUTION AMPLIFIER

The IM-VDA-01/04 from Iris Innovations is a single input to four channel output video distribution amplifier built into a compact ABS plastic housing for installation into applications where power consumption and physical space are a premium.

The unit features extremely low power consumption (100mA) and a choice of input voltages: 12VDC or

24VAC making it ideal for use in vehicles or aboard boats.

Use the IM-VDA-01/04 to increase the number of video outputs such as chart plotters, dedicated video monitors, TV's, digital recorders or video switchers.

Video Signal Detail

0.8~1.2V p-p 75 ohms Input Range

1V p-p 75 ohm Output.
